

# New Cosmetic Ingredient Compliance in China

## Background

A cosmetic ingredient is considered "new" in China if it is not included in the Inventory of Existing Cosmetic Ingredients in China (IECIC 2021). New cosmetic ingredients must comply with the Cosmetic Supervision and Administration Regulation (CSAR), the overarching chemical regulation which was implemented on January 1, 2021. According to the CSAR, cosmetic ingredients are classified according to their risk level. The risk level determines the management of the cosmetic ingredient for compliance in China.

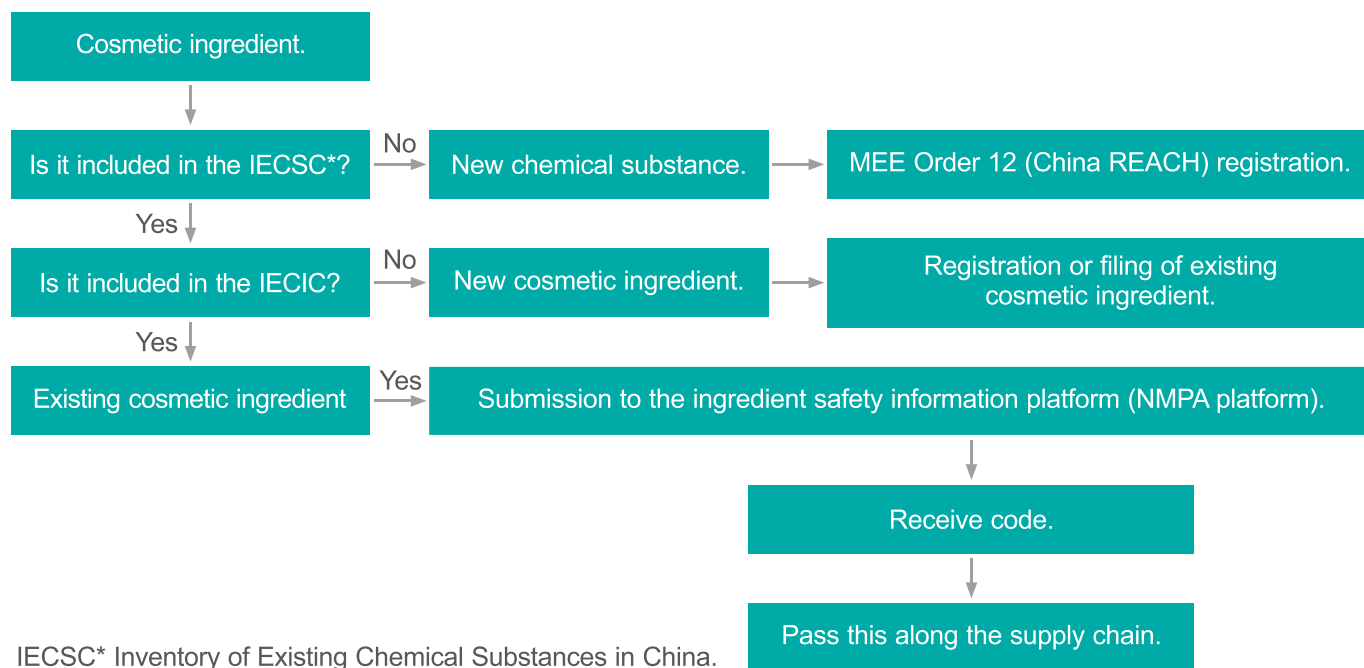

## Regulation Target

- Cosmetic ingredient manufacturers, importers and distributors; and
- Domestic responsible persons.

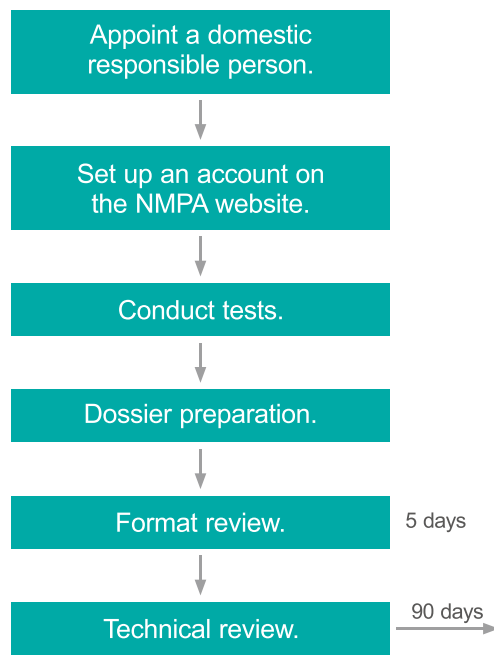

## CIRS Services

- Filing or registration of new cosmetic ingredients;
- Test coordination in China; and
- Acting as a domestic responsible person.

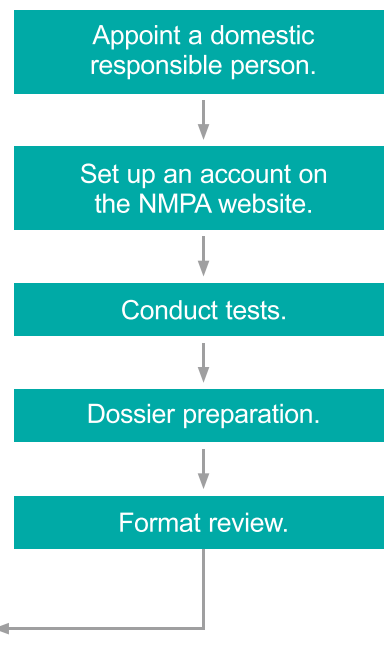

## Pre-market Compliance of Cosmetic Ingredients.

### High Risk

### Low Risk

High Risk refers to ingredients that possess the following qualities: preservatives, sunscreens, colorants, hair dyes, and freckle removal or whitening.
